

MICRO MINIMAL DIGITAL SINUS LIFT USING NOBEL GRAFT MATERIAL

DR. MAJED OMAR ISSA

- Ceo & owner for smile engineers dental center in Jordan
- Chairman of Jordan branch of WAUPS
- International lecturer in implant dentistry field
- Fellowship and diplomate of WAUPS

Jordan

Microscopic surgery has changed the philosophy and practice of modern surgery in all aspects of dentistry. It gave rise to minimally invasive surgery procedures based on the ability to visualize and to operate via small channels.

Using dental microscope with this nobel graft material have many advantages.
